ORAL LESION MYSTERY

Case Author: Dr. Alan Gould

Picture this...it's four o'clock and you are seated at your *virtual desk* in your *virtual office* when you receive a biopsy report from the **Oral Pathologist** confirming your suspicions – one of your three patients has a **dangerous oral lesion**. Visually all your patients' lesions look similar; by using the resources located on your virtual desk you **review** the **clinical data** for all three patients. All the **clues** to solve the mystery are hidden within the data, now the challenge is to determine **which patient has the serious problem** - and what lesions do the other two patients have?

Alan R. Gould, DDS, MS

Dr. Alan R. Gould is a nationally recognized expert in clinical oral and maxillofacial pathology, and a Diplomat of the American Board of Oral and Maxillofacial Pathology. Dr. Gould has served as the Editor of the Oral & Maxillofacial Pathology Section of Oral Surgery, Oral Medicine, Oral Pathology and Oral Radiology & Endodontics and as a consultant for

the ADA. He has also been the Director of the Oral Pathology department at the University of Louisville School of Dentistry, and maintains a clinical oral pathology practice in Crestwood and Louisville, KY. Dr. Gould and his team are highly skilled in patient evaluation, selection and performance of diagnostic procedures and tests and oral disease management.

PROGRAM DESCRIPTION

Match wits with one of the country's leading Oral Pathologists and see if you have what it takes to solve the Oral Lesion Mystery. This course is an interactive patient case simulation where you determine which of three patients has a dangerous oral lesion. The case begins in your virtual office with a report from an Oral Pathologist. You will review patient data while gathering clues to help solve the mystery using digital intra-oral images with "zoom" capabilities, patient charts and video patient interviews. Once your clinical judgment decisions are made, and the mystery solved, you may visit the resource section that includes articles and video commentary, along with a simulated phone consult with Dr. Gould.

Tired of the same old online continuing education courses?

MDDS has developed a new groundbreaking format of professional continuing education for dental professionals: interactive patient case simulations. These clinical cases are Internet based and available to you 24 hours a day. Each Professional Internet Case Simulation (PICS) program presents practitioners with real case challenges developed by esteemed clinicians. The PICS format includes unique features not seen in any other online CE course. Some of these features include: images and x-rays with "zoom" capabilities, virtual articulator, equilibration-in-motion, interactive key principles and a digital library. Each case will utilize video patient and case author interviews, the ability to chat with other PICS subscribers and case authors and an extensive resource guide for each topic.

Introductory Fee: \$39 for each participant
CE Credits: 2
